For Immediate Release

NCI Announces Approved Curb Manufacturer Program

NCI Building Systems has developed an Approved Curb Manufacturer Program which will streamline the design process and weathertightness warranty approval. The program will provide architects and roofing contractors with a list of Curb manufacturers that are working within NCI specifications and have been preapproved for use in the company's Weathertightness Warranty program.

“Armed with information before a project begins allows the design professional to properly specify curbs for the project,” says Ken Buchinger, Vice President/Corporate Warranties and Certifications. “It aids the roofing contractor by providing a list of approved curb manufacturers that he can contact to receive pricing information and know that he will not have problems with the curbs in the weathertightness warranty approval process,” he continued. Buchinger further explains that the curb manufacturer will issue a 20 year material and fabrication warranty with each curb. This ensures the building owner that he is getting a long-lasting curb on his roof.

The program will apply to all NCI companies including MBCI, Metallic Building Company, Mid-West Steel Building Company, Mesco Building Solutions, A&S Building Systems, Star Building Systems, Ceco Building Systems, Robertson Building Systems and Garco Building Systems.

The curb manufacturers listed below are participating with NCI in this program. For the most current list of approved curb manufacturers, please check the appropriate NCI company website:

Approved Curb Manufacturers			
Manufacturer	Location	Web Site	Phone
LM Curb	Longview, TX	lmcurbs.com	800-284-1412
Roof Curb Systems	Chattanooga, TN	roofcurb.com	800-683-5848
Mallory Metal Products	Santa Teresa, NM	mallorymetal.com	800-388-1031
Curbs Plus El Dorado, KS	Rossville, GA	curbs-plus.com	888-639-2872
Metallic Products	Houston, TX	mpvent.com	800-356-7746
KCC International, Inc.	Louisville, KY	kcccurbs.com	800-382-2872

The following illustrations demonstrate the type of curb required for trapezoidal and vertical leg standing seam roof systems. These curbs, when installed as shown in the appropriate roof system installation manual, qualify for inclusion in any of NCI's weathertightness warranties.

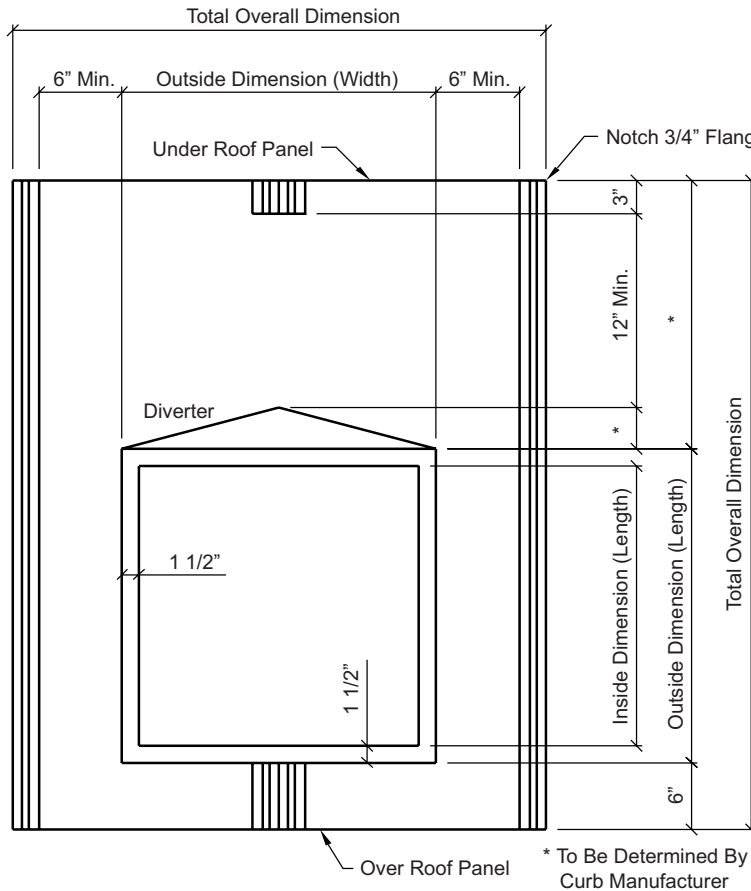

Insulated One-Piece Metal Building Roof Curb (Trapezoidal Panel)

Standard Requirements

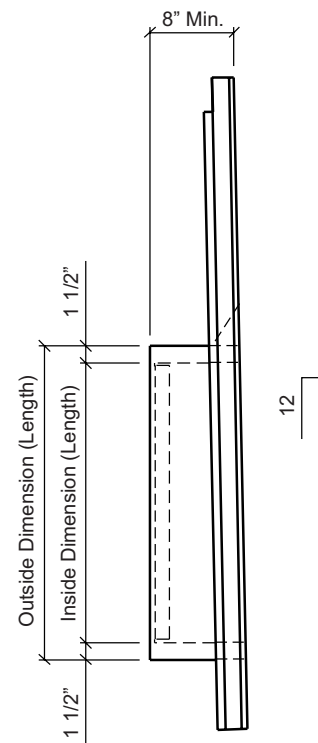

- .080 Aluminum Construction
- Corners Mitered and Welded Watertight
- Welded Cap Cells and Closure Caps (Fixed or Loose)
- Integral Water Diverter
- 8" Minimum Curb Height
- 1 1/2" Thick Fiberglass Insulation
- Under - Over Application
- Rib to Rib Application
- Rib Covers - Full Length Plus 1'-0"
- 20 Year Material and Fabrication Warranty from Curb Manufacturer

Required Roof Information

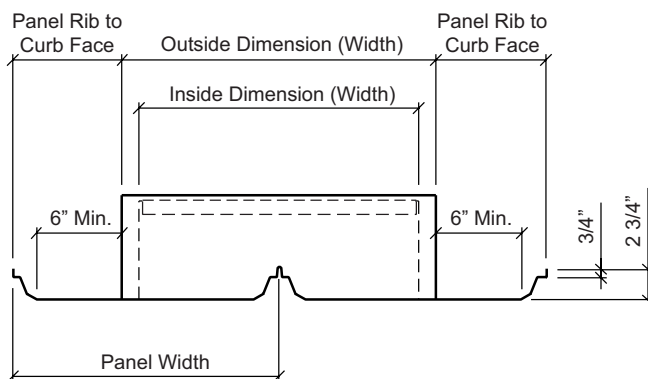

- Roof Panel Profile _____
- Roof Panel Width _____
- Roof Slope _____
- Outside Curb Dimension (Length) _____
- Inside Curb Dimension (Length) _____
- Outside Curb Dimension (Width) _____
- Inside Curb Dimension (Width) _____
- Panel Rib to Curb Face Dimension _____
