MBCI EXPANDS INSULATED METAL PANEL OFFERING

HOUSTON – MBCI has once again expanded its Eco-ficient™ insulated metal panel (IMP) product line to include the Grand H Series, a horizontal wall panel ideal for architectural applications. The Eco-ficient™ Grand H panel is available in widths of 36, 30 and 24 inches with insulation thicknesses of 2, 2 ½ and 3 inches. The Grand H series is available with reveals of 1/8 inch, 3/4 inch and 2 inches. Corner panels and a comprehensive line of aluminum extrusions are also available to provide a complete wall system.

In addition to the Eco-ficient™ Grand H Series, MBCI offers six other insulated wall panels and two insulated roof panels. All Eco-ficient™ panels have achieved excellent test results for thermal resistance, air and water infiltration and fire.

Eco-ficient™ IMPs offer many advantages over traditional building envelope materials, including reduced installation time, lower maintenance costs and greater energy efficiency. MBCI's Eco-ficient™ insulated metal panels offer an R-value of 7.69 per inch of insulation. They are available in a wide variety of colors as well as several applied finish options.

Since 1976, MBCI has remained an industry-leading manufacturer of metal roof and wall systems. With 16 locations throughout the United States, MBCI manufactures and provides its products for the architectural, commercial, industrial, institutional, residential and agricultural markets. For more information about MBCI and its family of products, visit www.mbc.com or call (877) 713-6224.
